DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The IDS filed February 14, 2006, has a citation lined through, because it is the current application.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 5 20, 22, 23, 24, 25, and 26 are indefinite because it is unclear if the limitation, "in case the slip ... said pressure lowering means" is a positive limitation.

Claim 1 recites the limitation "the lowered minimum value of said pressure" in line

12. There is insufficient antecedent basis for this limitation in the claim.

In claim 2 it is unclear if the "a preset time period" of line 6 is the same as the "a preset time period" of line 5.

The term "gentle" in claims 3 and 21 is a relative term, which renders the claim indefinite. The term "gentle" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the

Art Unit: 3682

art would not be reasonably apprised of the scope of the invention. There is no standard in which to determine what constitutes a gentle gradient.

Claim 15 is indefinite, because it is unclear what is meant by "a preset input torque acting".

Claim 26 is indefinite, because it is unclear what is meant by "another pressure re-lowering means". Does this mean it is claiming more than one? How is the lowering means different from the re-lowering means?

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 5-12, 20, and 22-27, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Asayama et al (US 6,454,675).

Asayama et al disclose a control system of a power transmission mechanism, in which a transmission torque capacity between transmission members varies according to a pressure to be applied to said transmission members and, in which the pressure to be applied to said transmission members is controlled on the basis of a slip condition between said transmission members as accompanies the lowering of said pressure (col. 2 lines 10-48), comprising: pressure lowering means (13) for lowering said pressure by a preset value; and pressure setting means (21) for setting said pressure, on the basis of the lowered minimum value of said pressure (col. 4 lines 35-54).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
